To Whom It May Concern

Ozone Depleting Potential

This is to confirm that Arabian Fiberglass Insulation Company Ltd (AFICO) has undertaken an audit of our glasswool and reflective foil laminate insulation manufacturing process referencing the US EPA list of Ozone Depleting Substances (Class 1 and Class 2) and determined that, to the best of our knowledge, no Ozone Depleting Substances are involved in either the manufacture or composition of these products.

AFICO glasswool insulation and reflective foil laminates have an Ozone Depleting Potential of zero.
