

# AUSMESH 300

## ROOF SAFETY MESH PLASTIC VINYL COATED

### AUSMESH 300 PVC COATED

The AUSMESH 300 becomes a permanent fixture for the life of the building and provides the required safe working environment throughout initial roof installation and for any maintenance work in the future. AUSMESH 300 is also a support for all insulation used on the building. AUSMESH 300 conforms to AS/NZS 4389.

PVC White installed on the Toyota Factory, Melbourne

### AUSMESH 300 PVC COATED

**Ausmesh 300 PVC coated: now manufactured with Bezinal wire before coating.**

- Consists of 2mm Bezinal – proven to be 100% more corrosion resistant than galvanized wire
- Tensile strength exceeding 450MPA
- Longitudinal wires spaced at 150mm centres
- Cross wires spaced at 300mm centres
- Width 1800 mm
- Length: 50m standard – cut to size to suit roof runs (minimum cut 20 metres)
- Lead time: 4 to 6 weeks
- Colors: White and Black (other colors on request)

**Ausmesh 300 PVC coated is not affected by high salinity, acidity or alkalinity, and will not corrode, fade or crack. Ideal for use in the following projects:**

- Chemical factories
- Swimming Pools
- Animal farming
- Sporting and entertainment complexes
- Anywhere an aesthetic look is required

**PVC coated AUSMESH is not sensitive to UV light: this is especially relevant where skylights are used.**
